Per 100,000	13.4	7.0	6.0

**Note: State hospital beds were not included in calculations of psychiatric bed capacity. Over 90% of state hospital beds are occupied by individuals who are incompetent to stand trial, a population with unique constraints that does not apply to the local behavioral health continuum. Exclusion of state hospitals has the secondary benefit of modeling need for psychiatric beds if state hospitals were transitioned to local, community-based alternatives.*
